

Parlay i8 - Application

Mobile Call Charge Saver

Parlay i8 as Call-Back Node saves money on mobile calls made in different Countries

Functionality

- Mobile user calls his company
- The Parlay i8 analyses callers' CLI
- If CLI is known the i8 will Call-back
- PIN verification in case of missing CLI
- Voice Prompts for guidance
- Pre-programmed DDI numbers: Just dial the DDI number. No additional dialling required
- Rejects calls in case they are not authorised
- CDRs provided to billing application if required

How to use (non DDI)

1. Call dedicated Phone No. from your mobile
2. Wait for call back – answer - hear dial tone or voice prompt
3. Dial the home country phone number you want to call.

Benefits

- Save approx. 50 % on the mobile bill (international calls)
- No abuse possible – Only verified callers are allowed
- Easy to use
- Do not require any change in the PBX
